

SNAKE MOTORCYCLES

ULTIMA® EL BRUTO® COMPLETE COMPETITION SERIES ENGINES

Emphasizing longevity, Ultima El Bruto® engines combine high quality components with affordable prices giving you the best value available. Our proven combinations deliver more horsepower and due to our exclusive balancing methods, we feel they are the smoothest engines on the market today. All castings in these engines are poured in U.S. foundries from C355 aluminum, a common U.S. military alloy known for its stability over multiple heat cycles. The engine components are machined on state of the art CNC equipment for guaranteed dimensional accuracy and repeatability. Our customers agree these engines are the best value anywhere.
